Adyant Nexa: India-Focused Lean Productized Agency Blueprint (2026–2027)

1. Feasibility Assessment

India in 2026 is a structurally good market for premium-but-lean web and performance marketing services, but it is brutally price-sensitive at the low end and crowded with freelancers and WordPress shops.[1][2][^3] Typical website development prices range from ₹10,000 for basic template sites to ₹5,00,000+ for complex custom builds, with small business informational sites often in the ₹15,000–₹40,000 range for CMS and ₹1,00,000+ for custom work.[1][2][^3] Performance marketing retainers for PPC and social usually sit between ₹10,000 and ₹1,00,000+ per month (excluding ad spend), which matches your current ₹10,000 retainer idea at the low end of the viable spectrum.[^4]

Key feasibility drivers:

- **Supportive conditions:** Growing D2C, coaching, and SME digitization, willingness to pay recurring retainers for predictable lead flow, and increasing awareness that cheap WordPress/Hostinger setups underperform.[4][3][^5]
- **Killer conditions:** SME mindset of "WordPress is enough," expectation of "pay after results" or no-retainer performance marketing, and chronic late payments and scope creep in Indian SMBs.[^6]
- **Real competition:** Ultra-cheap freelancers (₹5k–₹20k sites), small WordPress agencies (₹15k–₹60k), mid-sized dev shops (₹40k–₹1.5 lakh for business sites), plus in-house nephews/relatives who have basic WordPress skills.[2][3]

Wrong assumptions that must be fixed:

- Assuming clients will value "coded vs WordPress" as a technical argument is wrong; they care about speed, leads, brand, and reliability, not tech stacks.[7][5]
- Assuming ₹75k build + ₹10k retainer is a premium price is incorrect; it is mid-market or even low for real custom dev plus serious performance marketing.
- Assuming you can run performance work without clear contracts, upfronts, and control over tracking will lead straight back to non-payment and emotional drama.[^6]

Net: The model is feasible **only** if you position as a specialized, productized, conversion-obsessed boutique and keep a hard line on pricing, qualification, and contracts.

2. Recommended Business Model

The recommended model is a **hybrid productized service studio** (not a generic "agency" and not pure SaaS) with:

- Narrow, clearly named packages (sites, funnels, ads, automation) with fixed scopes and prices.
- Deep operational leverage via templates, reusable components, and checklists to keep delivery hours low.
- A roadmap to spin off the most repeatable internal tools into micro-SaaS later, once 10–15 paying service clients have validated patterns.

Why not pure agency:

- Traditional agencies rely on custom proposals, broad services, and headcount scaling; this will trap a solo founder in low-margin, high-chaos work.
- SME buyers in India negotiate agencies heavily; you need a "menu" where the answer to negotiation is dropping scope, not slashing price.

Why not micro-SaaS first:

- SMBs in India rarely pay for unproven SaaS from unknown brands; they pay for outcomes and relationships.
- Service work gives you domain knowledge, cashflow, and case studies to build SaaS later with real insight.

So the clear choice: **Productized hybrid** — tightly defined service packages with optional retainers, plus a long-term internal-tools-to-SaaS roadmap.

3. Service Ladder

At least 5 steps from low-ticket diagnostic to premium build + growth.

3.1 Ladder Overview

Step	Offer Name	Price Band (INR)	Ideal Client	Primary Outcome
1	Rapid Site & Funnel Audit	₹4,999 – ₹7,500 one-time	Any SME with existing site or ads	Clarity on what is broken and prioritized fixes
2	Conversion Blueprint Intensive	₹14,999 – ₹24,999 one-time	D2C, education, local services serious about growth	Detailed funnel, messaging, and ad plan
3	High-Performance Landing Page Build	₹35,000 – ₹60,000 one-time	Lead-gen focused businesses (education, real estate, auto dealers)	A single-page funnel that actually converts
4	Growth-Ready Business Site (Coded)	₹75,000 – ₹1,25,000 one-time	D2C, multi-service coaches, SMEs with serious growth goals	Fast, structured, conversion-oriented site
5	Performance Growth Engine (Ads + Automation)	₹20,000 – ₹75,000/month retainer	D2C, education, real estate, auto dealers with ad budgets	Ongoing leads/sales with dashboards and automation

Step	Offer Name	Price Band (INR)	Ideal Client	Primary Outcome
6	Custom Web App / MVP (Internal Tools, Portals)	₹1,50,000 – ₹4,00,000+ one-time	2–3 selected SMEs with strong budgets and clear ROI	Internal efficiency or new revenue stream

3.2 Offer Details

1) Rapid Site & Funnel Audit (Entry)

- Deliverables: 15–20 minute Loom video teardown, 5–7 page PDF with prioritized fixes across UX, copy, funnels, tracking, and speed.
- Use: Top-of-funnel lead magnet (paid). Can be redeemed against higher-tier project if client signs within 30 days.

2) Conversion Blueprint Intensive

- Deliverables: 90-minute strategy workshop (Zoom), recorded; Notion/Slides document with funnel architecture, lead magnets, ad angles, landing page wireframe, and basic automation map.
- Purpose: Paid discovery to filter serious clients and create the plan that feeds into builds and retainers.

3) High-Performance Landing Page Build

- Scope: One landing page (desktop + mobile), copy + design + build, basic tracking (GA4, Meta pixel, events), basic WhatsApp or form integration.
- Best for: Education lead gen, real estate project landing, test campaigns for D2C offers.

4) Growth-Ready Business Site (Coded)

- Scope: 5–10 pages (Home, About, Services, Proof, Blog/Resources, Contact), speed-optimized coded front-end, basic CMS or lightweight content management, GA4 + pixels, lead forms, WhatsApp click-to-chat, basic on-page SEO.
- Positioning: Not "custom code" but "growth-ready, fast, and conversion-focused," with a side note that it is **not fragile WordPress**.

5) Performance Growth Engine (Retainer)

- Scope: Meta + Google Ads management (search, performance max, basic remarketing), 2–4 campaigns, monthly landing page tweaks, basic WhatsApp/CRM automation, monthly report + 45-minute review call.
- Add-ons: Performance fee on deals closed (only if tracking is solid and margins support it), but only layered **on top of** a base retainer.[4][6]

6) Custom Web App / MVP

- Scope: Limited to clear use-cases aligned with your internal tool roadmap: mini-CRMs, lead routing dashboards, booking systems, simple internal ops tools.
- Structure: Fixed scope MVP (4–8 weeks), clear module list, no endless feature creep.

4. Pricing Table (INR) and Structure

4.1 Pricing Tiers

Offer	Tier	One-Time Fee	Retainer / Ongoing	Notes
Rapid Site & Funnel Audit	Single	₹4,999 – ₹7,500	None	Redeem 50% against build if signed in 30 days
Conversion Blueprint Intensive	Single	₹14,999 – ₹24,999	None	Mandatory for builds above ₹75,000
High-Performance Landing Page	Standard	₹35,000	Optional: ₹7,500–₹12,500/month (light optimization + analytics)	For simple lead-gen and test offers
High-Performance Landing Page	Advanced	₹50,000 – ₹60,000	Optional: ₹10,000–₹15,000/month	For high-traffic or complex integrations
Growth-Ready Business Site	Core	₹75,000	Optional: ₹12,500–₹20,000/month	5–7 pages, standard features
Growth-Ready Business Site	Plus	₹1,00,000 – ₹1,25,000	Optional: ₹20,000–₹30,000/month	8–12 pages, richer content, more integrations
Performance Growth Engine	Starter	Setup ₹25,000, then ₹20,000/month	Retainer only	For ad spends up to ₹75,000/month
Performance Growth Engine	Scale	Setup ₹40,000, then ₹35,000–₹60,000/month	Retainer only	For ad spends ₹75,000–₹3,00,000+/month
Custom Web App / MVP	Phase 1	₹1,50,000 – ₹2,50,000	Optional: support ₹15,000–₹25,000/month	Only for 2–3 handpicked clients
Custom Web App / MVP	Phase 2	₹2,50,000 – ₹4,00,000+	Support as above	Only after Phase 1 success

4.2 Billing Structure

- Advance: 50% to start for projects ≤₹75,000; 40%/40%/20% for projects >₹75,000.
- Milestones for >₹75,000:
  - 40%: On signing + basic discovery completed.
  - 40%: After design approval and staging site with core pages built.
  - 20%: Before final deployment to live domain.
- Retainers:
  - Always 1 month fee in advance.
  - No work (including campaign launch) without retainer received.

- Minimum commitment: 3 months for ads retainers.

4.3 Is ₹75k Build + ₹10k Retainer Underpriced?

Given that professional business sites in India typically range from ₹40,000 to ₹1.5 lakh for development alone, and performance marketing retainers commonly start around ₹10,000 and go upwards of ₹1,00,000 per month excluding ad spend, a **custom-coded, conversion-focused site plus ongoing ads management at ₹75,000 + ₹10,000/month is underpriced for serious clients.**[4][2][^3] It is acceptable as a **Core** tier for early traction if scope is strictly limited (pages, revisions, integrations), but the **Plus** tier should push toward ₹1,00,000–₹1,25,000 build and ₹20,000–₹30,000/month if you handle both tech and performance.

5. Unit Economics

5.1 Assumptions

- Effective solo utilisation target: 25–30 billable hours/week (rest is sales, admin, learning).
- Blended internal rate target: At least ₹1,500–₹2,000/hour in the first year, growing later.

5.2 Per-Offer Economics (Approx)

Offer	Delivery Hours	Revenue (midpoint)	Implied Hourly	Gross Margin (solo)
Rapid Audit	3–4	₹6,000	~₹1,500–₹2,000	95% (minor tools cost)
Conversion Blueprint	6–8	₹20,000	~₹2,500–₹3,300	95%
Landing Page (Standard)	18–22	₹35,000	~₹1,600–₹1,900	90%
Landing Page (Advanced)	25–30	₹55,000	~₹1,800–₹2,200	90%
Business Site Core	45–55	₹75,000	~₹1,500–₹1,700	85–90%
Business Site Plus	60–75	₹1,10,000	~₹1,500–₹1,800	85–90%
Performance Retainer Starter	10–12/month	₹20,000/month	~₹1,700–₹2,000	85–90%

5.3 Capacity and Break-Even

- Max concurrent builds solo without burnout: 2 medium sites or 1 big site + 1–2 landing pages.
- Max active retainers solo: 6–8 (depending on complexity) alongside 1 build.
- Practical monthly revenue at steady state as solo:
  - 1 Business Site Plus (₹1,10,000) + 4 retainers at ₹20,000 = ~₹1,90,000/month.

- Break-even revenue (assuming personal financial needs at ~₹80,000–₹1,00,000/month and low overhead): around ₹1,20,000/month gives comfortable survival and reinvestment.

5.4 Hiring Trigger

- Hire first support role (not CTO) when:
  - You have at least **₹2,00,000–₹2,50,000/month** stable for 3 consecutive months.
  - You consistently hit 60+ hours/week including sales and ops.
- First hire: **Technical implementer / full-stack junior** or a strong front-end dev to whom you can offload 50–60% of build hours at ₹40,000–₹60,000/month, maintaining 60–70% gross margin.
- CTO-level hire only at ₹8–₹10 lakh/month run-rate when you'll shift to CEO + CMO and start SaaS seriously.

6. 90-Day / 6-Month / 12-Month Roadmap

6.1 Months 1–3 (Now – June 2026): Target ₹1.5 lakh Total

Focus: Positioning, offers, first 3–4 paid projects on new pricing, 1–2 small retainers.

- Week 1–2:
  - Finalize service ladder, pricing, and one-page Notion sales sheet.
  - Build your own Adyant Nexa site with clear productized offers, case-study placeholders, and a strong "Why not WordPress" narrative framed around speed, leads, and reliability.
- Week 3–4:
  - Run outreach to existing 3–4 clients: convert at least 2 into **Conversion Blueprint** + **Landing Page** or **Business Site Core**.
  - Offer a modest loyalty discount but on new structure (e.g., ₹60,000 site with strict scope, or ₹30,000 landing page with optional ₹7,500 retainer).
- Month 2:
  - Close at least **2 Landing Page** projects and 1 **Business Site Core**.
  - Aim for 1 **Starter Performance Retainer** at ₹20,000/month from among these or warm network.
- Month 3:
  - Complete delivery of first set; collect testimonials, Loom walkthroughs, and results.
  - Hit cumulative ₹1.5 lakh via mix of project and retainer revenue.

6.2 Months 4–6 (July – Sept 2026): Target ₹4.5 lakh Total

Focus: Fill calendar with a mix of builds and retainers, introduce audits as a filter.

- Month 4:
  - Launch **Rapid Audit** and make it the default entry offer for cold leads.
  - Secure 3–4 audits; convert at least 2 into Landing Page or Business Site.
- Month 5:
  - Aim for 2 Business Site (Core/Plus) builds (₹75,000–₹1,10,000 each) and add 2 more retainers at ₹20,000–₹35,000.
  - Start saying "no" to sub-₹30,000 custom work.
- Month 6:
  - Streamline SOPs, templatize sections, and reduce delivery time by 15–20%.
  - Total revenue for Months 4–6 combined should cross ₹4.5 lakh with 3–5 active retainers.

6.3 Months 7–12 (Oct 2026 – March 2027): Target ₹13 lakh Total

Focus: Stabilize at higher pricing, selectively take app/MVP work, prepare for SaaS.

- Months 7–9:
  - Maintain 2 Business Site Plus builds per quarter and 6–8 retainers.
  - Introduce **Custom Web App / MVP Phase 1** for one selected SME client (₹1,50,000–₹2,00,000).
  - Start building internal tools: template library, audit automation, simple CRM dashboard.
- Months 10–12:
  - Systematize Adyant Nexa into a repeatable engine (SOPs, checklists, automations running reliably).
  - Hit cumulative ₹13 lakh for the period by:
    - ~₹1,80,000–₹2,00,000/month from retainers.
    - 3–4 Business Site Plus builds.
    - 1–2 MVP projects.

7. Lead Generation Plan (Solo Founder)

7.1 Channels to Start Now (Month 1–3)

- **Warm Network & Existing Clients:** Upsell current and past contacts into new structured offers.
- **WhatsApp + Local SME Groups:**
  - Join local business, startup, and industry groups (education, real estate, auto).
  - Share 1–2 Loom video audits/week (blur names) showing "before vs after" to trigger inbound interest.
- **LinkedIn Authority Content:**
  - 2 posts/week: teardown of bad local sites, funnel lessons, ad insights (no gyaan, only specific examples).
  - DM sequence to viewers who engage: invite them to a paid Rapid Audit.
- **Instagram Reels / Shorts:**
  - 2–3 short videos/week explaining "Why your WordPress site is losing you leads" and showcasing micro case studies.

7.2 Channels to Layer in Months 4–6

- **Outbound Email / DM:**
  - Target D2C, education, and real estate with bad sites or poor funnels.
  - Offer a **paid audit**; avoid free consulting.
- **Google My Business (GMB):**
  - Optimize GMB listing for "website development", "landing page expert", "performance marketing" in Delhi NCR.
  - Collect 10+ 5-star reviews from satisfied clients by Month 6.

7.3 Channels for Months 7–12

- **Builder/Broker Partnerships:**
  - Offer co-branded project microsites and lead funnels in exchange for fixed fees plus small success fee.
- **Audit-Led Webinars / Workshops:**
  - Monthly small Zoom sessions for 5–10 SMEs where you live-audit 2 websites and pitch the Rapid Audit.

8. Sales Process

8.1 Step-by-Step

1. **Prospecting**: Identify targets via LinkedIn, WhatsApp groups, GMB, and manual browsing.
2. **First Touch**: Short, specific message referencing a real problem on their site/ads and inviting them to a paid Rapid Audit.
3. **Discovery Call (30–45 mins)**:
    - Understand revenue model, current site, lead sources, ad spend, decision makers, and urgency.
    - Qualify budget and intent using simple questions (e.g., "What are you currently investing in marketing each month?").
4. **Audit Pitch**:
    - Position Rapid Audit as "low-risk x-ray" before surgery.
    - If they resist paying for the audit, they are likely wrong-fit.
5. **Proposal**:
    - For higher-ticket work, send 2-option proposal:
        - Option A: Landing Page + Starter Retainer.
        - Option B: Business Site Plus + Scale Retainer.
6. **Close**:
    - Use scarcity (limited monthly slots) and clear timelines.
    - Sign simple contract + collect advance before any build work.
7. **Onboarding**:
    - Kickoff call, access checklist, content collection, and timeline confirmation.

8.2 Objection Handling Scripts (Conceptual)

- **"WordPress works fine"**:
    - Don't argue tech; ask about outcomes: "If your current site is perfect, why are you exploring changes? Usually, clients come when either speed, leads, or control is broken. Which of these is hurting you most right now?" Then show quick comparative examples of improved speed or conversion.
- **"Your price is too high"**:
    - "The cheaper option is to stay as you are. The investment here pays off only if we can unlock at least 3–5x more leads or enquiries. If your budget cap is ₹20,000, I recommend you stick with a basic WordPress freelancer. If you want a serious growth system, this is the minimum viable setup." This respectfully disqualifies low-budget prospects.
- **"We will pay after results"**:
    - "Performance-only models require full access to your CRM, margins strong enough to pay us a meaningful share, and legal agreements. For now, we work on an upfront

retainer model with transparent reporting. If we work together for 6 months and tracking is strong, we can explore a hybrid performance fee."[^6]

9. Client Qualification Framework

9.1 Scoring Matrix (0–2 each, max 10)

- Budget:
  - 0: Wants everything under ₹20,000.
  - 1: Comfortable at ₹35,000–₹60,000 for projects or ₹10,000–₹15,000 retainer.
  - 2: Comfortable at ₹75,000+ projects and ₹20,000+ retainers.
- Decision Speed:
  - 0: "Need to discuss with 5 people, come back in 3 months."
  - 1: 2–3 weeks decision cycle.
  - 2: Decides within 7–10 days.
- Growth Intent:
  - 0: No clear goals, just "see what happens".
  - 1: Some goals but vague tracking.
  - 2: Clear revenue/lead targets and willingness to invest.
- Professionalism:
  - 0: Mixes personal and professional, late to calls, pushes for free work.
  - 1: Some chaos but reachable.
  - 2: Respects time, responds promptly, can handle contracts.
- Industry Fit:
  - 0: Ultra-low-margin or non-digital.
  - 1: Average margins, some online presence.
  - 2: High-ticket or scalable (D2C, education, real estate, auto).

Interpretation:

- 0–4: Reject.
- 5–7: Only take if pipeline is empty and scope is small.
- 8–10: Priority.

9.2 Separating Personal and Business

- Never start work without signed contract and advance, even for friends.
- Phrase: "I value our relationship, which is why I insist on using the same professional process for everyone. It avoids misunderstandings."
- If personal contact resists, they are automatically disqualified as a client.

10. Contract + Payment Protection System

10.1 Core Terms

- **Advance:** 50%/40% upfront as per ticket size; non-refundable after work starts.
- **Milestones:** Clear deliverables and acceptance criteria for each payment stage.
- **Revision Caps:** 2 design revisions; beyond that billable at ₹1,500–₹2,000/hour.
- **Kill Fee:** If client cancels after design approval, 70% of remaining project fee payable.
- **Late Payment Clause:** 2% per month interest on overdue invoices after 7 days.
- **No Launch Without Final Payment:** Final 20% must be paid before DNS changes or live deployment.
- **Scope Creep Rule:** Any new feature or page beyond signed scope gets a mini-quote.

10.2 Simple Contract Outline (India, GST Proprietor)

1. Parties and scope.
2. Detailed deliverables and timeline.
3. Payment schedule and terms (including GST).
4. Client responsibilities (content, approvals, access).
5. Intellectual property and licensing.
6. Confidentiality and data protection.
7. Limitation of liability.
8. Termination and kill fee.
9. Dispute resolution (Delhi jurisdiction).

11. Delivery SOPs

11.1 Onboarding Checklist

- Signed contract and invoice.
- Advance received.
- Access to domain, hosting, existing analytics, ads accounts.
- Brand assets: logo, colors, fonts, imagery.
- Existing copy or raw material.

11.2 Project Kickoff

- 60-minute call to align on goals, ICP, positioning, and success metrics.
- Confirm sitemap, primary call-to-action, and timelines.

11.3 Design & Build Gates

- Wireframe approval (low-fidelity).
- Visual design approval (key screens).
- Staging build approval (core flows tested).

11.4 QA Process

- Cross-browser and device checks.
- Form and WhatsApp flows tested.
- Page speed checks and basic SEO validation.

11.5 Launch Checklist

- Final payment received.
- Backup of old site (if replacing).
- DNS updated, SSL active, analytics and pixels verified.
- Handover Loom video + mini-documentation.

11.6 Retainer SOP

- Inclusives: campaign optimization, monthly reporting, 1–2 minor site tweaks, basic automation maintenance.
- Exclusions: new pages, new funnels, complex integrations, custom dev (billed separately).
- Cadence: monthly report + call, weekly async updates for active campaigns.

12. Automation Roadmap

12.1 Automate Now (Months 1–3)

- Lead capture to CRM:
  - Use Notion, Airtable, or a simple CRM to auto-log form and WhatsApp leads via Make or n8n.
- Proposal and invoice templates:
  - Use Notion/Google Docs templates, auto-filled via Zapier/Make from a lead sheet.
- Reporting:
  - Use Looker Studio or similar, fed by GA4 and ad platforms, to auto-generate simple monthly dashboards.

12.2 Automate Next (Months 4–9)

- Audit Automation:
  - Build a simple internal tool that pulls basic site metrics (speed, mobile friendliness, headline analysis) and generates a structured audit draft.
- Onboarding Workflows:
  - Use n8n/Make for automated onboarding emails/WhatsApp messages after contract signing, sharing checklists and scheduling calls.
- Retainer Management:
  - Create a central dashboard (e.g., internal web app) showing each client's MRR, campaign status, key KPIs.

12.3 Potential SaaS Candidates (Months 10–24)

- Audit tool as a standalone micro-SaaS.
- Simple broker/builder CRM for real estate leads, with WhatsApp integration.
- Lightweight campaign reporting portal for SMEs.

13. Adyant Realty Strategy (Under Adyant Nexa)

13.1 Low-Capital Plays Now (No HRERA)

- **Project Landing Pages:** For builders and brokers, build high-converting microsites per project at ₹35,000–₹60,000.
- **WhatsApp Lead Funnels:** Lead forms on site drive to WhatsApp flows, then to broker teams.
- **Mini-CRM for Brokers:** Simple web app or Airtable-based tracker with tags, stages, and follow-up reminders.
- **Performance Marketing for Local Builders/Dealers:** Meta lead ads + Google search campaigns with clear CPL targets; retainer + performance fee.
- **Content and Listing Microsites:** Niche sites for specific micro-markets or property types, monetized via lead sale to brokers.

13.2 When to Open Adyant Realty Vertical

- Condition: ₹2 lakh clean surplus in Adyant Nexa account **and** at least 3–5 consistent real estate clients.
- Steps:
  - Register HRERA.
  - Ring-fence real estate brand (Adyant Realty) but share internal tools and team.
  - Position Realty as "marketing-first real estate advisory," not brokerage.

14. Competitive Moat

14.1 Differentiation vs Alternatives

- Vs freelancers (cheaper):
  - Clear productized offers, stronger strategy, proven performance marketing, and professional process.
- Vs WordPress agencies:
  - Faster, more reliable builds tailored to conversion and performance, without plugin bloat and security updates headache.[7][3]
- Vs big digital agencies:
  - Direct founder involvement, faster decisions, less bureaucracy, and focus on small set of offers instead of diluted service menu.
- Vs in-house teams:
  - Broader experience across clients, sharper performance skills, and tools they would not build internally.

14.2 Positioning Statement

> Adyant Nexa builds fast, conversion-obsessed websites and growth systems for Indian businesses that have outgrown cheap WordPress and random agencies. One founder, zero fluff, clean performance.

15. Risk Register

#	Risk	Probability	Impact	Mitigation
1	Underpricing and overwork	High	High	Enforce minimums, productized scope, and rate discipline
2	Late/non-payment	High	High	Strong contracts, advances, kill fee, no launch without final payment
3	Scope creep	High	Medium	Written scope, revision limits, mini-quotes for extras
4	Client churn due to poor fit	Medium	Medium	Qualification matrix, paid audits only, say no early
5	Burnout as solo founder	Medium	High	Time blocking, limited concurrent projects, strict off-days
6	Over-reliance on one or two big clients	Medium	High	Diversify to 6–8 retainers, limit any one client to <30% revenue
7	Tech debt from quick builds	Medium	Medium	Template library, refactoring, limited tech stack
8	Delayed move into SaaS	Medium	Low	Treat SaaS as bonus, not core, until revenue targets are met

#	Risk	Probability	Impact	Mitigation
9	Market downturn in key niches	Low–Medium	Medium	Diversify segments (D2C, education, real estate, auto)
10	Legal/compliance issues (ads policies, data)	Low	Medium	Follow ad policies, simple privacy policies, basic data hygiene

16. Do This Now / Later / Not Yet

Now (Months 1–3)	Later (Months 4–12)	Not Yet (After 12+ months)
Finalize service ladder and pricing	Custom web app MVPs for select SMEs	Full-blown SaaS products with external customers
Rebuild Adyant Nexa site with offers	Strong automation of audits and onboarding	Hiring CTO or senior leadership
Convert existing clients to new structure	Systematized LinkedIn and YouTube content	Large office, fixed overheads
Launch Rapid Audit and Conversion Blueprint	Regular webinars/workshops	Pure performance-only ad models
Close 2–3 landing page/site builds	Builder/broker structured partnerships	Taking any client who resists contracts or advances
Start LinkedIn + WhatsApp + IG content	Hiring 1 junior dev or freelancer	Expanding into too many unrelated service lines
Tighten contracts, invoices, SOPs	Prepare and test internal tools for SaaS spin-offs	

17. Final Recommendation (Starting Move)

What to sell first (next 90 days):

- Primary offer: "**High-Performance Landing Page + Starter Performance Growth Engine**".
- Target client: D2C brands and education businesses in Delhi NCR with at least ₹50,000/month current or planned ad spend and broken/weaks sites.
- Pricing: ₹50,000 landing page (Advanced tier) + setup ₹25,000 + ₹20,000/month retainer (3-month minimum).
- Lead-gen method: LinkedIn authority + targeted DMs, WhatsApp group visibility, and direct outreach to existing contacts and local SMEs, always funneled into a **paid Rapid Audit** first.

This starting move hits your strengths (performance + funnels + build), creates fast case studies, and gets you to the ₹1.5 lakh and ₹4.5 lakh milestones with minimal complexity while building the right kind of client base.
